Drawings

1. Figures 1 & 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).
2. The drawings are objected to because the “transverse plane” recited in claim 1, line 3 is not indicated in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to as failing to comply with 37 CFR 1.77(c) for failing to include section headings.

Art Unit: 3679

4. The disclosure is objected to because page 3, line 25 includes “ff”. What “ff” is supposed to mean is unknown.

Claim Objections

5. The claims are objected to as failing to comply with 37 CFR 1.75(i) because elements of the claims are not separated by line indentation.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. Claim 1, lines 4 & 5 recites the nonsensically, “on the ends of two forks, comprising a divider”.
- b. Claim 1 recites the limitation "the wall of the corresponding one of the two parts" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3679

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipate by Koyari et al, US 5,419,740. Figs. 1 & 2 show a wide angle constant velocity joint 40 comprising two forks 46, 48 forming the input an output members of the joint, two spiders 50, and a central core 42, 44 forming a central cavity for sliding movement in a transverse plane 98 for means forming constraint seats 94 for spherical heads 46B, 48B on the ends of the two forks. Figs. 19 & 20 show the joint further comprises a divider 176 which divides the cavity into two housings for two substantially symmetrical constraint members 54A, 54B forming the respective seats for the spherical heads 46B, 48B of the forks, the two constraint members being connected together and each of them sliding between the divider 176 and the wall (see col. 12, line 24) of the corresponding one of the two parts of the central core. Fig. 19 shows the two constraint members 54A, 54B are joined together by two central protrusions (see for example the protrusion 144).
